

VOLUNTEERS NEEDED!

Help document local flooding and storm impacts through community science

The MyCoast New York portal is used to collect and analyze photos of flooding, changing shorelines, and hazardous weather impacts across New York's varied coasts and waterbodies.

Photos are linked to real-time environmental conditions to create reports that help emergency managers, local planners, residents, and state agencies understand our changing environment and make informed decisions.

REPORT TYPES

FLOOD WATCH -
Tracking flooding
across the state

STORM REPORTER -
Documenting
storm damage
