

CLEAN BOATS CLEAN WATERS

Watch out for unwanted aquatic hitchhikers when you move from one waterway to another!

Aquatic invasive species (AIS) are non-native plants and animals that threaten native plants, wildlife, and their habitat. They also affect humans by degrading boating and fishing areas and reducing lake shore property values and tourism. Once AIS are established, eradication is almost impossible.

WATERCRAFT CHECK POINTS

When you leave a waterway:

-  Check and remove any visible mud, plants, fish or organisms from boats, trailers, equipment, clothing, dogs, etc.
-  Clean and eliminate water from equipment.
-  Dry anything that comes into contact with water.

Never release plants, fish, or other animals into a waterway unless they came from that waterway.
